

INSULATED FRAS FLEXIBLE DUCTING

ORDER CODE: INDUCTFRAS

DESCRIPTION

Constructed from dual layer polyester insulation, FRAS PVC, all stainless-steel hardware and featuring a sewn rubber wire helix cover strip, our heavy duty insulated flexible FRAS ducting is designed for industrial use. Available in a range of diameters and lengths and compatible with our range of IECEx ventilation and air-conditioning equipment, our FRAS ducting delivers chilled ventilation in hazardous environments to protect your people and maintain productivity.

KEY FEATURES

- Flexible
- Heavy duty
- Integrated earth bond connection points
- Collapsible for compact storage
- Tested in accordance with IEC 62631-3-1 and AS/NZS (IEC) 60079-0 for resistivity
- Tested to MDG 3608 – fully compliant

TECHNICAL SPECIFICATION

Diameter	300, 400, & 500mm
Length	1m, 2m, 5m, & 10m
Material	FRAS PVC with polyester insulation
